

Organizing for Health and Safety

Decluttering

Organizing services are designed to create a hassle free, rewarding experience for clients. We can organize everything from the basement, to the attic and out to the garage! Let a professional declutter and organize your living space to realize the safest, healthiest and most fulfilling environment possible.

- Remove excess belongings and either selling, donating or disposing of them.

Medical Rehabilitation

The rehabilitation process is difficult, planning can make it easier on the patient and their caregivers. Our staff can rearrange your living space to make it more conducive to your recovery process. Examples include:

- Single level living solutions
- Rearrange furniture and belongings to accommodate medical bed, medical equipment, etc...
- Establish a walker and wheelchair friendly environment by widening walkways and moving furniture to enable ease of mobility

National Coalition on Aging Falls Free Initiative

Educating and empowering caregivers to be proactive instead of reactive is an institutional priority. Illness and injury shouldn't dictate the transition process, healthy people should. Together we can reduce the frequency of fall related injuries.

- One-third of Americans aged 65+ fall each year.
- Every 13 seconds, an older adult is admitted to the ER due to a fall
- Falls are the most common cause of nonfatal trauma-related hospital admissions among older adults and the leading cause of fatal injury.
